Legend:
- ⊢ $\hat{\tau}$ point estimate & $\hat{D}$
- $\hat{\underline{\tau}}^*$: Loh & Stein's marked point (N=2500)
- ● 95% BCa CI of $\underline{D}$
- $\hat{\underline{\tau}}^*$: modified marked point (N=2500)
- ● 95% BCa CI of $\underline{D}$
- $\tau = 1$

y-axis: $\tau(d_l, d_m)$

x-axis: Distance band midpoint $(1/2(d_l + d_m))$, at 2m increments from an average case (m).
